Planning Application 20241054

Retrospective Erection of Front Porch- Walnut Hill Nursery

9 December 2024

Please note my Objection to this Planning Application.

This porch is an extension to the Front of the main building in front of the Property line. This is unnecessary overdevelopment of a green belt property. The front of the property has been altered extensively with larger windows with additional lighting and this large glass extension. The street scene has changed completely, and all the shrubs and planting that used to be in front of the building have been removed to enable this porch to be built and add additional parking spaces. This new frontage is the total opposite of the discrete building given Planning Approval in 2001. The extension has no justifiable purpose for over developing this site.

This application should be considered as a part of a larger change of use that has taken place changing Walnut Hill Nursery from an agricultural property to an Operating Centre for a multiple companies.
