Reasons for comment:

Comments:

This development is inappropriate development in the green belt
Close to National landscape in area that floods regularly
Newlands lane is narrow with no passing places or lighting or foot paths and this development will further cause problems to existing residents of the Culverstone Valley area
We like the dark sky in our rural area and this development will cause further urbanisation of the green belt . The Dark sky helps the local wild life and insects , with so many developments in Meopham at this time we worry about the loss of food production ,and pollution which will increase with each development
The destruction of a historic building one of the last buildings of the Trosley towers estate Waterlow
was formerly a hunting lodge a arts and crafts design of 1901
Also it was the home of a will known as motor racing driver and BBC journalist in the 1940 and 1950s

The junction with the A227 is not very safe , with no crossing points for pedestrians
The bus service is poor and unreliable and none on Sundays the new occupants of the houses will reliable on cars for transport
The station is to far away to walk and the trains are at over crowded
The local schools Hospital doctors are all at over subscribed
The power net work and water supply and internet are all not good

For all these reasons I strongly OBJECT to this development

Kind regards
