Comments Details

Commenter Type:	Member of the Public
Stance:	Customer made comments in support of the Planning Application
Reasons for comment:	
Comments:	I support the environmental screening, this building plan will go against the council 0 emissions due to the carbon footprint of the said works. 500 houses with very poor public transport will bring 700 to 1000 cars with in the village, bring high car pollution within the area of the primary school. Water supply with also cuase drought issues especially with global warming. Other issues will be rubbish dropping and sound pollution. The local amenities will not cope with the large influx of people. Local wildlife will suffer as well, with building on farm land restriction there food chain. With less crop filds, means that replacements will have to be shipped in from abroad, more mass environmental issues. In all very bag move, drown sites need to be used. Affordable housing need to be placed in city areas to cut the carbon footprint.

Kind regards
