

The Contractor is to check all drawings before commencing work.

All dimensions must be checked on site and verified before construction, if any discrepancies are identified the designer must be notified at the earliest opportunity

Note: All structural elements must be checked by a certified structural engineer, anything shown on this drawing is for illustration purposes only.

Note: The drawings have been measured and completed to the best of abilities, with equipment that works to generally +/- 1mm however mistakes will be made, such that everything should be physically checked on site and verified, inc new works, if at all in doubt please ask!!
