Reasons for comment:

Comments:	It is important to preserve our natural environment for sustainable & ecological reasons. Darenth Valley is at capacity and local hospitals cannot cope currently. Local GP surgery's are struggling with current patient load, putting patients at risk if the number of residents increase. - Secondary schools are nearly at capacity negatively impacting on our young residents. - Further Education options are limited locally Increase in traffic infrastructure Slow moving traffic close to a school - more pollution for vulnerable children. Current shops not sufficient and parking in relation to this is dangerous with current levels let alone with a large increase in people in the village. Ecological systems damaged Increase in air pollution risking the health of vulnerable residents. Increase in traffic and current infrastructure will not cope with increase. Removal of trees hedges impacting on wildlife including bats and badgers. Building on greenbelt will increase risk of flooding. Current infrastructure, schools, hospitals, GP surgery will not cope and this application if successful will negatively impact on the health and safety of residents.
