Reasons for comment:

Comments:	The local infrastructure is already beyond capacity and the impacts of this proposed development will result in: 100-200 more cars on the road which during commuting times is already grid locked. Local schools are already struggling with capacity and will therefore exacerbate this challenge. This is also the same for the GP surgery and other public services. There are significant drainage issues in the local area and this proposed development will increase floods to roads as a direct result of building on green/grey belt land. I understand that there would also be impact on some rare wildlife species if this development went ahead. Above all, the proposed developments locally will slowly start to merge the local villages creating a noisy town. It's time to stop destroying out beautiful British countryside and identify better sites in or around the main towns where the infrastructure could support developments.
