

Dear Sir or Madam,

Further to my email sent on the 12th May,2026, including the email from Southern Water, I would like to add the following observations:

The email was sent directly to me, my Post Code being ME3 7JY, which is the same as Buckland Farm. It is the classic 'last straw', whereby just one additional house, with one additional family will break the water supply to the whole area. I am sure the residents of Higham will thank you for that.

On the 5th April,2026, at the Planning Meeting at Woodville Halls, Mr Tupper made a promise that the Bus Service would be improved. He did not clarify how, or whether this means running buses along Chalk Road; this route was deemed too dangerous previously, which is why no buses serve this area at present. It was a big commitment,& is he really in a position to promise this, or was it just an assumption?

There is also concern over the facility for parking. Will there be dedicated parking spaces within the Estate Boundaries, or will it be on a 'first come first served' basis?

Also is it correct that a GLC is involved in this development, or is that just a malicious rumour?

I look forward to your reply to my email,& thank you in anticipation.

Please acknowledge receipt of this email.
