Kandla Grey Porcelain Paving

- ✓ R11 Non-Slip Rating
- ✓ Low Maintenance
- ✓ Stain, Scratch & Shock Resistant
- ✓ Hard-Wearing & Highly Durable
- ✓ CE Approved

Kandla Grey Porcelain Paving is designed to look just like a natural stone with varying grey tones and a surface that mimics a naturally riven texture.

The flat surface of each porcelain slab is designed to mimic the appearance of natural stone with all the modern conveniences of man-made, vitrified paving.

The lightly textured and non-slip surface adds extra safety to any family garden, or even a larger commercial project, helping to maintain grip underfoot even when wet! Porcelain slabs are suitable for patios, pathways and driveways due to their extremely durable nature and the R11 non-slip rating means that the slabs can be used around swimming pools or water features too.

Outdoor porcelain paving is robust and long-lasting with a stain and scratch-resistant surface, making it the perfect low-maintenance option. The non-porous slabs will prevent any excess moisture from building up within the tile, so your paving won't be prone to any build-up of moss or algae.

There's no need to worry about excess rainwater or accidental spillages either! These outdoor tiles can simply be wiped clean with a damp cloth to remove any dirt or spills, saving you time and money! Porcelain is also impervious to fading and will stay true to its original colour, even when subjected to excessive heat and sunlight during the Summer months.
