

Appendix A (as referred to in the KCC Biodiversity informative)

OFF-SITE GAINS (NEEDS TO BE REGISTERED)

'Off-site' biodiversity gains are any BNG measures proposed outside of the red line boundary. It can be achieved through habitat creation on land owned by the applicant/developer, a third-party provider or through the purchase of BNG units from a habitat bank operator for a site which is registered on the Biodiversity Gain Site Register.

The statutory Biodiversity Gain Plan (BGP) must contain the biodiversity gain site register reference number for any offsite units if these are used. BNG sites must be registered here: [Register a biodiversity gain site - GOV.UK](https://www.gov.uk/register-a-biodiversity-gain-site)

If off-site habitat creation is required, we direct the applicant towards the Kent Biodiversity Net Gain Site Register⁵ available on the Making Space for Nature in Kent and Medway website. Biodiversity Net Gain Guidance for Kent is also available on this website.

If any off-site habitat creation/enhancement is proposed outside of the LPA boundary/National Character Area of the impact site these will be subject to spatial risk penalties.

Where off-site gains are secured on land owned by the developer (but outside the redline boundary), or on third-party land (but not through a 'habitat bank operator'⁶), the biodiversity net gain needs to be subject to a deed of conservation covenants or Section 106 (as appropriate). Section 106 agreement templates are available on the Planning Advisory Service website. It is generally inappropriate to rely solely on conditions to secure off-site biodiversity net gain. The following needs to be secured as part of the off-site biodiversity net gain:

- The submission of a habitat management and monitoring plan (HMMP);
- Notice of HMMP implementation and completion of the habitat creation and enhancement works;
- Timescales for completion of habitat creation, and the submission of a completion report;
- Submission of monitoring reports;
- A habitat monitoring fee to be paid to the local planning authority on every habitat management monitoring event.

The HMMP shall be submitted when the general BNG condition is discharged and shall contain the following information ⁷:

- (a) a non-technical summary;
- (b) the roles and responsibilities of the people or organisation(s) delivering the HMMP;
- (c) the planned habitat creation and enhancement works to create or improve habitat to achieve the biodiversity net gain in accordance with the approved Biodiversity Gain Plan;
- (d) the management measures to maintain habitat in accordance with the approved Biodiversity Gain Plan for a period of 30 years from the completion of development; and
- (e) the monitoring methodology and frequency in respect of the created or enhanced habitat to be submitted to the local planning authority.

Monitoring reports shall be submitted to local planning authority in writing in accordance with the methodology and frequency specified in the approved HMMP.

Where off-site gains are to be secured through a 'habitat bank operator' (which has its own legal agreement and HMMP), no additional conditions or section 106 obligations are

required, above a condition requiring biodiversity net gain to be delivered as set out in the planning application.

The submission of provisional/draft legal documents outlining the agreement between the applicant and the provider of any off-site gains are advisable prior to determination to confirm that the proposed route to delivering net gain is feasible, but this information is not required until submission of the pre-commencement Biodiversity Gain Plan.

How the BNG is to be achieved will have to be agreed, secured and, where applicable, registered on the Biodiversity Gain Site Register, prior to the submission of the pre-commencement Biodiversity Gain Plan.

⁶ A registered BNG Habitat Bank is a site which has been registered on the Biodiversity gain site register and

has a site register reference number (Register a biodiversity gain site - GOV.UK).
