KEY FEATURES

Our Flowering and Berrying Mixed Native Hedging Packs

- Each pack of 50 plants is enough for 8-10 metres of hedging
- Packs contain 6 native species, all of which flower and produce autumnal fruits
- The species are 50% Hawthorn plus 10% each of 5 additional species selected by us from the following - Blackthorn, Dog Rose, Crab Apple, Elder, Purging Buckthorn, Guelder Rose, Spindle, Dogwood or we have Blackthorn based packs (instead of Hawthorn based packs) which are good in damp areas. They contain all the same species, but Blackthorn is 50% instead of Hawthorn.
- If you are claiming a farm grant, you must order the 45/60cm 2 year old plants. These packs are livestock safe, but use our Horse Paddock packs if you are planting near horses because some hedging species are dangerous for horses
- All the plants on this page are grown in Herefordshire
- All the plants on this page are bare root plants and are only available in the dormant season (November to April), but we also have 20 or 50 plants as pot-grown mixed native packs (Hawthorn, Blackthorn, Dog Rose and Field Maple) which are available all year round

Please phone (or email us at hello@hedgenursery.co.uk) if you have any questions, would like advice, or your order is likely to come to over £1000 - we may be able to offer a better price than the online price. Our experienced horticulturists answer calls and emails, and we're always very happy to help.
