

20240687 and 20240686 Custom House The Terrace Gravesend Kent DA12 2BW

Port of London Authority

Thank you for your emails and letters received on 3 February regarding applications 20240687 and 20240686. Further information/clarification has been submitted for both applications relating to noise, including the fixing shut of windows and the scheme for testing internal noise levels. The Applicant liaised with the PLA prior to the submission of this information/clarification and I can therefore advise that the PLA has no objection to the submitted documentation and no further comments to make in relation to noise.

The application seeks the variation of condition 2 in relation to the list of approved plans. Whilst the PLA's comment (as set out in its email of 03/09/2024) in relation to the area by the gazebo does not appear to have been addressed, as the discrepancy was in the design and access statement it would appear to not be impacted by the variation of condition 2.
