

20240013 St Joseph's Convent Preparatory School.

Thank you for your letter.

The residents of [REDACTED] wish to deny and refuse the application of buildings herewith.

The overshadowing, invasion of privacy and noise, pollution, from the proposed buildings are not acceptable and will greatly reduce the value of our property.

[REDACTED] we need peace and quiet, for mental health and healing. The ongoing buildings works, noise, dust, pollution are not acceptable and will cause disruption [REDACTED]
[REDACTED]

The increased traffic congestion will undoubtedly bring higher road traffic accidents and further lack of parking, that will add to the already high levels of vehicles, as surrounding areas consistently use our Private Close, to park freely using residents places of parking facility. Resulting in illegal and nuisance parking.

The proposed buildings are completely out of character with the surrounding areas and are not welcome, as an eyesore in comparison to the distinctive Victorian building that currently resides.

The height of the proposed medical building and surrounding buildings will infringe on our privacy and peace of our property.

We will be overseen and overshadowed in our garden, with the blocking of our light also.

This is a breach of our human rights under The Human Rights Act -Protocol 1, Article 1. A person has a right to peaceful enjoyment of all their possessions, which includes the home and other land. Our garden is an extension of our home.

I have serious concerns of local wildlife that would mean the irradiation of Foxes, birds, bats, slowworms and other treasured animals, insects and butterflies. We do not want to live in a concrete jungle and appreciate these very important creatures are part of local symbiotic relationships with nature and healthy surroundings, part of the charm of our home.

I also have concerns that in the original letter to Galliard (detailing our concerns about the scheme) that the comments to the council of community involvement was misleading as it had omitted 38 neighbours comments!?

I hope our voiced concerns are met with empathic ears.

I await your response.
