Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	Approving this development and Building on Green Belt will have serious environmental effect on the village and surrounding areas. Increase in traffic pollution, air quality and nature will be detrimental to all that live in the area and wildlife. Overcrowding a village when over recent years Gravesham and the surrounding areas have seen tremendous amounts of new developments has already caused havoc with traffic along the A2 and pushed vehicles onto the A227. Construction vehicles will increase pollution and danger to local residents and the environment that is already under threat will be significantly and irreversibly damaged. Congestion and disruption to local services, such as doctors surgeries and local hospitals are at critical levels already. We cannot sustain further development in this area. School places are for local children are also under pressure and adding another 500 households will cause serious issues. The Green belt should be protected at all costs for future generations. There are alternatives with grey and brown belt locations and these should be developed as priority in the first instance.

Kind regards
