Stance: Customer made comments in support of the Planning Application

Reasons for comment:

Comments: Absolutely no hesitation in providing off road parking and dropped kerb. Huge issues in this area with 'random' vehicles and parking which impact not only on the Church but Saint Georges school children who have to navigate the crossing and pathways before and after school.
All these houses should have off road driveway and dropped kerbs, it would prevent bumper to bumper parking which is not predominantly from these residents. In addition, most households have more than one vehicle so it would eliminate the need for roadside parking.
I am aware also that this applicant had a paving slab put through their vehicle window one day after purchasing due to being parked on the roadside - this is most unlikely to happen on a private driveway.

Emergency services currently have little chance of attending these properties in addition as currently there is nowhere for them to stop without having to block the main road.

Kind regards
