Commenter Type: Neighbour

Stance: Customer made comments in support of the Planning Application

Reasons for comment:

Comments: I support the EIA as I believe that it will clearly show that the areas of land that are being proposed are unsuitable for housing due to the detrimental impact it would have on the local wildlife and also the detrimental impact it would have for local residents.

So an EIA is essential.

Gravesham planning office need to also look carefully at the comments submitted by local residents. Most people have commented that they are object. But they have not fully understood the wording. They have not fully understood what an EIA is. They believe they are objecting to the houses being built. Please take this into consideration and read the comments, not just which button, (support or object,) they pressed.

Again
I support an EIA.

Kind regards
