

With respect to planning application 20260207

. Words fail me. Infrastructure Meopham and Instead Rise GP Practice are both at capacity documented by letters from both.

Just look at traffic that uses green lane. I already have a problem getting out at rush hour. The mind boggles at another 1,450 extra cars using the road as well. Additional traffic would also cause pollution. The train station has no lift so anyone disabled and anyone with a pram will not have access to the train station.

There would not be enough water supply. The internet is bad enough as it is. This is green belt. We moved here to be in the countryside not a town.

Has the hospital been taken into consideration. The waiting lists are already at capacity. Has this been taken into consideration. The whole plan is ludicrous..

Kind regards
