## Comments Details

Commenter Type:	Member of the Public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	I wish to register my strong objection to the proposal to build 350 new homes in Meopham.

### 1. Severe pressure on the A227

The A227 is already operating beyond capacity, particularly during school run hours. It also serves as a cut-through for traffic heading between the A2 and the M20, which intensifies congestion even further. Adding hundreds of additional vehicles from a development of this scale will worsen delays, increase air pollution, and create safety issues on a road network that is already struggling.

### 2. Limited access to GP services

Residents already face difficulty securing timely doctors' appointments. The local surgeries are at or near capacity, and the NHS shows no sign of expanding provision at a pace that would support an the additional households. Approving this development without guaranteed, funded medical capacity would further reduce access to essential healthcare.

### 3. Insufficient school places

Local schools are similarly stretched. There is real concern that existing primary and secondary schools will not be able to accommodate the influx of students this development would generate. Without confirmed investment in educational infrastructure, this proposal risks forcing children to travel out of the area or placing unsustainable pressure on already oversubscribed schools.

Conclusion

The scale of the proposal is simply incompatible with Meopham's existing infrastructure.
