Comments:

I would like to object to this development. The Government and Council seem very keen on ruining the countryside and the local villages by allowing so many to be built on when there are many brown field sites in the Gravesham Borough that could be used to build proper social housing that's needed such as the derelict hospital in the town centre close to amenities and a railway station. Not these large private developments when the only people who gain are the land owners and the building companies. The road structure in the area is not sufficient for another large development. The lanes are very narrow and already very congested from traffic that uses Sole Street as a cut through from the A2. People speed through the village which makes it very dangerous for villagers as there are no pathways and the situation will worsen when the Lower Thames Crossing is being built and this large development could see an increase in traffic by some 1500+ cars. The exit onto the A227 is right by busy schools and shops making it dangerous. The fields are currently used to grow crops and the continual removal of fields for food will have an impact on freshness and prices.

The local amenities could not cope with such a large number of houses, the doctor's surgery is already over subscribed and it's difficult to get an appointment to see a doctor. There was a water shortage last year and this development will lead to further pressure on these resources. The area is currently enjoyed by walkers via public footpaths and retaining our outdoor space is critical for mental health and future generations. Once lost it's gone for good.

Kind regards
