

ECOLOGICAL ADVICE SERVICE

TO: Rebecca Harrison

FROM: Helen Forster

DATE: 16 July 2024

SUBJECT: Denton Wharf, Gravesend 20240527

The following is provided by Kent County Council's Ecological Advice Service (KCC EAS) for Local Planning Authorities. It is independent, professional advice and is not a comment/position on the application from the county council. It is intended to advise the relevant planning officer(s) on the potential ecological impacts of the planning application and if sufficient/appropriate ecological information has been provided.

Any additional information, queries or comments on this advice that the applicant or other interested parties may have must be directed in every instance to the planning officer, who will seek input from the EAS where appropriate and necessary.

We advise that we are satisfied that no ecological information is required.

It is our understanding that the works are proposed to replace an existing diesel generator with electrical power services. As such the noise levels from pier will be reduced.

All the work are on existing hard standing/wharf and no piling works are proposed to be carried out within the Thames. Therefore as long as the works are carried out following best practice construction measures to minimise noise/dust/dirt impacting/entering the Thames we are satisfied that any ecological impact will be minimal.

If you have any queries regarding our comments, please do not hesitate to get in touch.

Helen Forster MCIEEM
Biodiversity Officer
