

Planning application 20260815

I can't believe this is yet another building application in this area.

The A.227 cannot cope with even more traffic, which is used by container lorries as a cut through. In parts, this road is subject to flooding making it even more dangerous.

This proposed site is not near a railway station and public transport is dire, thereby necessitating the use of personal transport. Even more traffic!!!

Southern Water have already stated that the area needs improvements to be made in order to cope with more housing. Can't see that happening!

Doctors and schools are unable to take any more patients and pupils, so where does that leave any proposed "new residents" and their families?

Please consider this application sympathetically and stop the area becoming a built up town, as opposed to a village in the heart of the Kent countryside.
