

20230745 WER Packing Supplies Unit J1 Lower Road

KCC Heritage 22 August 2023

Thank you for consulting us on the submission of the report by Quest which sets out the findings of the geoarchaeological fieldwork and palaeoenvironmental assessment undertaken at the WE Roberts – J1 Extension site. The results demonstrate that the development would be unlikely to have a significant below-ground impact and, in my opinion, the work represents a reasonable mitigation of the impacts of the development, and I would be happy to recommend that Condition 5 (parts i and ii) attached to 20221142 could be discharged in full.
