Reasons for comment:	
Comments:	This area is always heavily congested at certain times of the day and both building works and completion will not make this any better. This development would lead to a significant increase in traffic congestion, and could pose a risk to highway and pedestrian safety. There are Insufficient Services the existing local infrastructure cannot cope with the increased population. The GP surgery is already not coping with the population it has. The development would lead to unacceptable levels of noise, light, or air pollution during and after construction. The development would cause the unrestricted sprawl of a built-up area. It represents an inappropriate encroachment into the countryside.

Kind regards
