Stance:	Customer objects to the Planning Application

Reasons for comment:

Comments:

I object strongly to this application as it will block our view of the park and cause a major disruption to the enjoyment of our property to myself and my partner. From reviewing the application a new access road from Milton place is due lead into the new property. This will greatly increase the traffic and noise to our apartment. We are both engaged in hybrid working in which we spend considerable time working from home in dialogue with Clients over the phone. [REDACTED] a psychologist who needs to consult with several of her clients daily and needs a quiet environment to consult with them. In addition my wife is currently studying several days a week from home and the resultant noise and cause a major disruption to her studies.

The noise from construction and traffic will make it no longer possible for us to conduct work from home and in the case of my wife not allow her to speak with her Clients.

We were informed in the letter that a consultation took place in early March but we were not informed and were not given an opportunity to voice our disapproval.

Part of the reason for purchasing the property was that it was a quiet street facing a park that would not be subject to planning permission. The proposed construction will not only block our view of the park but take away the quiet tranquility we have enjoyed here so far.

Please let us know how you intend to resolve these problems as this proposal will greatly diminish the quality of our living experience.

[REDACTED]

Kind regards
