

20221268 Former Northfleet Cement Works The Shore

KCC Biodiversity Officer 30 December 2022

I am unsure if you require our comments for condition 5 (20221268) as there is no mentioned of ecology/biodiversity within the condition wording or the reasons, however, virtually all of the planting is non-native. Non-native species have little to no biodiversity value and, therefore, we cannot recommend a discharge of the application until a revised plan has been submitted which should feature a much higher proportion of native species.
