

Why Choose Dale Joinery?

Frames are manufactured using quality, seasoned engineered timber – which provides resistance against twisting and jamming as the opposing grains even out natural moisture movement.

Four stage factory sprayed micro-porous coatings – ensures a pristine, low maintenance finish with a guarantee to the term of 10 years on paint finishes and up to 6 years on stained without the need for redecoration.

Factory fitted energy saving double glazed units – which are almost twice as effective at retaining heat as regular double glazing. Heat reflective coatings and argon filled units provide a class leading u-value of 1.1W/m2k.

Internally beaded glass – means more secure windows and doors as the glazing cannot be removed from outside. The bead of externally glazed products is always a point for water ingress, rot and can lead to premature unit failure.

Windows are fitted with espagnolette locking systems – which pull the opening window tight against the seals for security, heat insulation and noise insulation. All window handles are key locking to meet current insurance requirements.

Doors are fitted with multi point locking systems - solid brass hinges and three star security cylinders fitted as standard that are snap-safe, anti-bump, anti-pick and anti-drill to combat modern methods of burglary.

Drained and vented glazing system – allow moisture to escape and air to flow around the sealed units to prevent premature misting and failure of the glass. Units carry a 10 year guarantee.

Dual colour and colour matching available – for those who wish to match internal decorations. We have a vast colour range available and can mix colours to suit your palette.

A carefully selected range of traditional and contemporary hardware - to suit all types of property.

Selection of astragal glazing bar sizes - to choose from. Bars are manufactured as a separate cassette and are available in 18mm, 27mm and 36mm widths.

All of our windows and doors are bespoke; this means they are made to the exacting requirements of you, the customer and of your home. They combine traditional or contemporary appearance with 21st century advances in security and insulation.
