Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why they are exempt from doing so.

[Find out more about biodiversity net gain, and access digital tools from our partners that can help determine if you are exempt, or produce the biodiversity metric information required.](#)

Please add all the exemptions or transitional arrangements that apply and provide a reason why

Exemption:

Retrospective planning permission

Reason for selecting exemption:

Exemption:

Development subject to the de minimis exemption (development below the threshold)

Reason for selecting exemption:

The application is considered to be below the threshold and therefore exempt from the requirements to provide Biodiversity Net Gain (BNG) as the application site does not impact a priority habitat and impacts less than 25 square metres of onsite habitat or 5 metres of on-site habitats. In this respect it is noted that the application site, including the road access, is entirely hard surfaced and contains no grassland or hedgerow that would counter this exemption.

Note: Please read the help text for further information on the exemptions available and when they apply
