Reasons for comment:

Comments:	<p>The building of this number of homes cannot be sustained with the present info structure at this location.</p> <p>The increase in vehicle traffic will create severe congestion on the A227, which is already heavily congested and likely to increase with the building of the new Thames Crossing. Vehicle access from the site onto the A227 will create danger and increase the likelihood of accidents, further pollution and delays in public transport.</p> <p>The sudden increase in the population will severely impact on schools, doctor surgeries and other public services.</p> <p>Flooding of roads, which is already a problem in the area of the development, will increase following the building on green belts land.</p> <p>There will be an increase in noise levels and pollution, which will impact on existing residents and wildlife.</p> <p>If approved I am concerned that this will set a precedent and lead to further loss of green belt land.</p>
