Stance:	Customer objects to the Planning Application

Reasons for comment:

Comments:	This development can't go ahead and the developers have not considered what is currently there in the neighbourhood. The local facilities including doctors (no space available for additional doctors), a primary school (a stone's through away) that already caters for majority of children from out of the area. This would lead to increase traffic as local children can walk, public transport is appalling. The parking currently at school times is well over capacity and cannot cope with anymore cars in local area. The parking at local shops is already over capacity with no where for disabled people to park. The increase of traffic on A227 is noticeable year on year. That many hours is not sustainable, electricity (we had power cut in night winds) drainage problems would increase, water companies can't hope with additional houses, pipes would be under more pressure and burst. We already have plenty of event space that is not used to so adding more will be a waste. We are surrounded by countryside and under used play areas so this will also be waste of resources. No consideration of what is actually needed in the area. A development of this size will be detrimental to the lifestyle people live here for. We need fresh air not concrete and pollution.
-----------	--

Kind regards
