Strongly Agree	Strongly Agree	Strongly Agree	As a local resident who lives 200 metres from this site I think it would be superb. Gets my support !!!	completed	2024-09-08 19:16:48	2024-09-08 19:17:57
Strongly Agree	Strongly Agree	Strongly Agree	I live in Medway and this site has been derelict and an eyesore for a while so I think it will be great for BP to redevelop it with extra quick EV charging points. Its location on the A2 will be excellent for people travelling to the coast or into London. Looking forward to also having an M&S.	completed	2024-09-05 11:40:50	2024-09-05 11:46:52

Agree	Agree	Agree	I'm just concerned about the traffic on the roundabouts as it's very congested there now.	completed	2024-09-02 07:38:23	2024-09-02 07:40:15
Strongly Agree	Strongly Agree	Strongly Agree	Provision for motorcycles parking spaces.	completed	2024-09-01 18:44:18	2024-09-01 18:45:27
Disagree	Agree		The traffic in the proposed area is incredibly bad at most times. Having this station set up as designed will add increased traffic with no additional provisions for the local community. However if it could be accessed directly on and off the A2 this may help. We already have 2 petrol stations within half a mile of each other I do not see why we need a 3rd. A sensible place for this proposal would be further down the A2 where there was a previous petrol station, there is access on and off the A2 at this place and it would not impact the local community	completed	2024-09-01 18:19:43	2024-09-01 18:24:51
Strongly Agree	Strongly Disagree	Strongly Agree	Provision of an M&S is very welcome as it is much missed since the closure of the store in Gravesend town centre..its a yes from me !	completed	2024-08-31 10:13:10	2024-08-31 10:15:34

Agree	Agree	Agree	My concern is littering . There is already an overflow of litter from the current station , which spills onto public pathways and walks . Its ruins the area for locals. I want to now how you will make sure litter is collected frequently and public paths kept clear as there will be refuse from the shops & service stops .	completed	2024-08-28 09:20:26	2024-08-28 09:24:16

Agree	Agree	Disagree	We don't need another petrol station, there is one in the immediate vicinity and at least another three within a two minute drive. Charge ports are a good shout, but not fuel. Especially not from BP, who hold zero accountability for oil accidents/spills they are responsible for.	completed	2024-08-27 13:48:13	2024-08-27 13:50:46

Disagree	Disagree	Disagree	I've disagreed to the proposal until you demonstrate that you will take responsibility for all the litter and rubbish generated outside the Tollgate. Corporates love the expansion of their business but could not give a damn about the consequences of the environmental damage of litter caused by their customers.	completed	2024-08-26 12:49:26	2024-08-26 12:52:24

Strongly Agree	Agree	Disagree	Not sure if you need another petrol station one just across the road, why don't you do a deal with them and combine the two sites in two one, having a petrol station combined with a bigger Marks & Spencer's would be better, then lots of small petrol stations. Gravesend is already full of Poundland, Lidl's and lots of cheap shops, ideally, we need a big M&S or Waitrose and then additionally with a petrol station & car wash would be a bonus or fast food.	completed	2024-08-26 07:11:28	2024-08-26 07:16:21

Strongly Agree	Strongly Agree	Strongly Agree	I think it's a great idea and wish it had been done sooner. The site is currently an eye sore and reflects badly on Gravesham to those visiting the area and using that junction on the A2. The addition of an M&S Food store will also be very much welcome as the one in Gravesend town centre closed down many years ago and not everyone wants to get caught in Bluewater or Dartford town centre traffic to get to the nearest M&S Food store. It's an ideal location with quick access. Can't wait!	completed	2024-08-23 15:15:24	2024-08-23 15:19:28

			This is a much needed M&S in the area of Gravesham. Please consider the surrounding areas of Gravesham of Meopham, Longfield, Cobham, all of which are areas of no M&S Foodstoreb or any M&S as a matter of fact. Gravesend M&S was closed in 2014 after 100 years.			
			I have been personally thinking of the idea of this site being exactly this setup for years. If my opinion is taken into consideration, this M&S Foodstore will have the highest sales of any M&S - BP in Kent.

Agree	Agree	Agree	Vehicle access to the development requires very careful thought. The roundabout is heavily trafficked and to introduce an additional movement into and out of the Tollgate site is likely to make this junction more dangerous for users. More so as a lot of users will be strangers to this site as this will be one of the very few service areas between Dartford crossing and the Channel Crossing of Dover / Folkestone.	completed	2024-08-22 13:39:09	2024-08-22 13:47:36
			Whilst broadly in favour of redeveloping this site, the vehicle access arrangement must work safely for that support to continue.			

Strongly Agree	Strongly Agree	Strongly Agree	The current woodland which surrounds the site makes it secluded and dense, so please could multiple footpath entrances be created for the site, which will give easier access for pedestrians and cyclists.	completed	2024-08-22 13:21:03	2024-08-22 13:23:59

Strongly Agree	Agree		I think M&S is not a good choice for Gravesend. This is not a high income area and many will be priced out. The lidl and other services around the corner will appeal more. You would need variety such as restaurant or something that will make them use it over the existing facilities. It is also worth considering keeping the main building and demolishing the newer hotel section at the back. The original tollgate building (old pub) is an icon of the area and has been around for a long time. Seeing it repainted and done up will do more for business than a flat building no one will see until they pass it on the A2. There is an example pub near by that was turned in to a Tesco. Turning the old pub in to a shop might be a better idea. It keeps the character of the area, brings back an old icon of road users and will be much more noticeable and draw people in as many are curious about the building due to it being closed off for so long.	completed	2024-08-22 08:43:04	2024-08-22 08:48:18

			This is a second fueling station simply across the road to a well established fueling station which serves the community well. Along with a third being half a mile up the road. Along with a fueling station on the other side of the road on the A2 (a junction up). This is just going to create even more traffic on the residential roads of gravesham- which are already in states of disrepair and over used. Moreover, the roundabout which provides an entrance this site is not fit for purpose when adding all of this additional traffic and would need to be changed- otherwise there would be even more of a back up on to the A2 of queuing traffic waiting to use the roundabout. Making an already busy roundabout, even busier. Additionally- will you have provisions in place to prevent the build up of young people in their cars, using the space/car park as a place to meet up, rev their engines and play loud music? Further disrupting the local neighbours. This is already an issue with the current fueling station- causing dangerous drivers on the surround roads also. Even more light/sound/general pollution, and additional rubbish disposal. On top of what is already produced by the existing station.

Agree	Agree	Strongly Agree	Currently the site is an eyesore and a wasteland. The area needs to be redeveloped in an ecological and environmentally sympathetic way. The site proposals would provide needed charging points as the country attempts to be more 'green', although this may increase local pollution levels that are already quite high, especially during construction of the proposed hub and with the likelihood of local diversions that will inevitably be required. Strongly Agree	Strongly Agree	Strongly Agree	Would be great to see this derelict site redeveloped and an M&S would be brilliant. There is a BP garage on the other side of the old A2 which is scruffy and dirty, it is always very busy so the demand is clearly there - something nicer to rival that would be welcome.	completed	2024-08-21 09:42:44	2024-08-21 09:44:22

Strongly Agree	Strongly Agree	Agree	A good proposal for a development that should also help the area and provision for services for the A2. It will obviously negatively impact the existing nearby local garage provision. There does need to be local access without the necessity of using the A2.	completed	2024-08-21 08:55:50	2024-08-21 09:00:40

Strongly Agree	Strongly Agree	Strongly Agree	The site will do Gravesend a world of good, more EV chargers (which are desperately needed in the area) along with an M&S and the best part of it all, job opportunities! I have concerns about the maintenance of the EV charging points. What assurances can you provide ensuring that all EV Charger point will be well maintained and remain available at all times?	completed	2024-08-21 08:07:42	2024-08-21 08:08:32
