5. Identification of Tree(s) and Description of Works

Please identify the tree(s) and provide a full and clear specification of the works you want to carry out.

You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work.

Where trees are protected by a Tree Preservation Order, please number them as shown in the First Schedule to the Tree Preservation Order where this is available. You should use the same numbering on your sketch plan (see help for sketch plan requirements).

Please provide the following information:

- Tree species
- The number used on the sketch plan); and
- A description of the proposed works.

Where trees are protected by a Tree Preservation Order you must also provide:

- Reasons for the work; and where trees are being felled
- Proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

e.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with one standard ash in same position.

T1Sweet Chestnut - Castanea sativaTo remove 11 lowest branches around the complete canopy of multi stemmed tree being as follows: 4 on stem to north west : 2 on north east stem over the road : 2 on East stem over the road : 2 to the south east on south east stem and 2 to south on the south east stem. To reduce 1 branch over the roof line to allow 2 meters clearance from the property line to the west. To remove all major deadwood.
Reason of works is to leaving the tree as a more upright habit within the confines of the boundaries as much as possible
