Reasons for comment:

Comments:	I have a number of concerns for these planned works. Starting with the [REDACTED] This will be an immediate eyesore as [REDACTED] This would very unsightly, cause major noises, disturbance and also obstruct current views. And if I am reading correctly to the documents supplied, it appears there will be a new entry way to this storage facility (otherwise correct me if I have misread this) which will cause a major disturbance due to continuous vehicles entering and leaving the site [REDACTED] [REDACTED] And should this be a new entry way, would this have an effect on the current parking situation? If yes, then this will cause major parking issues for all as there isn't a massive amount of free parking spots currently already. And if this were to affect current parking availability, what would be offered in return of this? Not only will these planned works cause continuous disturbance once in place due to not only vehicles entering and leaving continuously, but also the level of noise when handling the storage on site. And this will also cause a massive amount of disturbance during construction of the new site.
-----------	---

Kind regards
