Application Summary

Address: Nuralite Industrial Estate Canal Road Higham Rochester Kent ME3 7JA

Proposal: Application for removal of condition 4 ,6,12 and variation of condition 7 attached to 20190290 - The proposal is for the systematic redevelopment of the existing Nuralite site. This includes the importation of inert materials to cap, and landscape the historic asbestos landfill, thus containing its contamination risk. To demolish the existing buildings of the Nuralite industrial estate, deal with existing contamination, both through capping and removal of areas of hydrocarbon pollution, the laying of new service and utility infrastructure and the construction of 11 new purpose built light industrial type units and a site office; to allow removal of passing places, temporary traffic controls, Archaeological works and implementation of a permanent TRO for all traffic.

Case Officer: Mr Richard Hart

Commenter Type: Neighbour

Stance: Customer objects to the Planning Application

Reasons for comment:

Comments: Hi my original objection still stands I am totally against this application as the roads in this area will not take the amount of heavy goods vehicles safely, if you make it one way the vehicle speeds will increase and whose here to monitor it. With the amount of public use these roads get either through dog walkers, pedestrians going to railway station or school where there are no footpaths, cyclists and horse riders there is going to be a bad accident or fatality. When they start building the new tunnel the traffic will increase again.

Kind regards
