Stance:	Customer made comments in support of the Planning Application
Reasons for comment:	
Comments:	As an Indian family with deep roots in this community, we strongly believe in the values of progress, harmony, and creating a better environment for future generations. My parents have lived directly opposite this site for many years, and we have always valued the importance of a safe and well-maintained neighborhood. After speaking with the homeowner, we are fully supportive of his proposal. The addition of a living roof will not only enhance the views from my parents' flat but will also bring natural beauty to the area, in line with our cultural appreciation for greenery and sustainable living. More importantly, these improvements will help transform William Street into a cleaner, more secure space, removing the current neglect that unfortunately attracts antisocial elements such as drug addicts and drunks. In our culture, we believe in the importance of community well-being, and we sincerely hope the council will listen to the voices of local residents who are directly affected by this. We fully support this application, as it represents a much-needed step towards regenerating this part of Gravesend, making it a safer and more welcoming place for everyone.

Kind regards
