To FINISH

WE:

YOU'RE IN GOOD COMPANY

Does your warehouse meet HSE requirements?

HSE document HSG76 states: "Where racking is likely to be struck by lift trucks & other vehicles it should be protected"

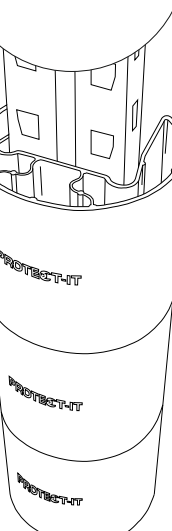

HSE also state protection fitted needs to protect the upright from front impact and side impact where most of the damaged occurs.

If you are going to conform to HSE requirements make sure you fit a protector that meets the recognised European Standard **FEM 10.2.02**.

- Easy to remove for rack inspections
- Easy to fit by hand - no tools required
- Effective in cold stores as low as -40 C
- Sold in over 70 countries throughout the world
- Deflects in the same way as a car bumper to absorb impacts
- Passes both front and side impact tests to conform to **FEM 10.2.02**

HSE GUIDELINES STATE THAT EVERY UPRIGHT SHOULD BE PROTECTED

Important Information:

All Aisle dimensions are Rack to Rack.

Customer to check with forklift truck provider that the forklift operates in aisles and all spaces indicated on drawing.

It is the customer's responsibility to check that the floor is of suitable construction to erect pallet racking and capable of sustaining the weight of the racking and the goods it will hold, to its maximum loading capacity. We can appoint a structural engineer on your behalf should you think the floor is unsuitable. This will be an extra cost.
