Dear Sirs

Re: 128 Milton Road, Gravesend, DA12 2PG.

**Application to seek approval of the details required under Condition 4 on
Decision Notice 20140214.**

We hereby apply for this condition to be approved and supply again the information previously submitted when seeking clearance and approval of the proposed ventilation system. The wording of the Condition meant that final approval could not be granted until commissioning of the system has taken place, however, there was also a requirement to apply for the details of the ventilation scheme to be approved before installation. We applied previously with details of the ventilation system proposed to be installed and received confirmation that the details of the Vent-Axia ventilation are approved by way of an email from Richard Hart dated 15th October 2018, a copy of which is attached to this letter.

The system is now installed and has been tested after being commissioned so we also submit the commissioning certificates for each of the 12 flats that the ventilation system supplies.

The original air quality report and the ventilation system details are also submitted again along with a letter from the building owners to confirm that maintenance of the ventilation system will be undertaken in accordance with Vent-Axia's specification.

We trust this application will be found to be complete and should any additional details be required please email me and I will address the requirement.

Yours faithfully

A handwritten signature in blue ink, appearing to be "Jonathan Bolton".
