Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	I object to Planning Ref. 20250992 for the proposed development on Wrotham Road opposite the parade of shops. The area is already a well-known congestion and accident hotspot, with parked cars lining the road and traffic building around the junctions with Green Lane and the shopping area. At school start and finish times, vehicles struggle to pass safely due to the narrow carriageway and the volume of cars associated with Meopham Community Academy and nearby nurseries. Introducing several hundred new houses, along with the traffic from hundreds of additional cars and service vehicles, would intensify these pressures to an unsafe level.

The site itself forms part of a long-established agricultural landscape and is situated close to drainage channels and low-lying areas that already experience seasonal surface-water issues. Replacing permeable farmland with extensive hard surfaces will increase flood risk to existing properties and infrastructure, especially during periods of heavy rainfall linked to climate change. A development of this scale also undermines local and national sustainability aims. It would lock in a significant rise in carbon emissions through construction, increased car dependency and the loss of green land that currently absorbs CO₂ and supports local biodiversity.

The existing road network around the A227 is already strained, and funneling even more traffic into this bottleneck would heighten pollution levels and reduce air quality for residents, school children and shop users. The visual impact on the

nearby Conservation Area would also be substantial, eroding the rural character that defines this part of Meopham. Given the cumulative safety, environmental and infrastructure impacts, this proposal is neither sustainable nor appropriate for the location and should be refused.

Kind regards
