

20251290

I live [REDACTED] to the site of the proposed planning application and have concerns about the following:

1. My kitchen and dining room face North East and consequently are quite dark rooms at the best of times. The proposed development would be building [REDACTED] of these rooms greatly reducing the entry of light into my property.
2. Whilst I note on the plan that there is provision for off-street parking, I do not have, nor have room to provide, off-street parking. Should I have to park further away from my house due to increased traffic this would mean having to negotiate a narrow road with no pavements and blind corners - dangerous during the day, even more dangerous at night.

These are my main concerns with regards to the proposal.
