

Dear Mrs Parkin.

20260207

My family and I have been residents of Meopham for over 60 years, and we know that to grant planning permission for all these houses in this location would be a total disaster for the existing inhabitants, the environment, by vehicular pollution and the total inadequacy of Infrastructure and road safety considerations.

You have seen the zebra located outside of the secondary school, but you are probably unaware of its history.

By staging a road blockade which was joined by dozens, if not hundreds of mothers with pushchairs and prams, and subsequently assisted by the police, my wife was the person instrumental in putting it there 50 years ago, it has saved many lives since.

Prior to its installation two children, one cycling to school, died at this point from road accidents. You know the traffic is far worse now.

This road and its by-roads, particularly Norwood lane, cannot accept any more traffic.

The A227 Meopham Road was then all those years ago, a very fast cut through from the A2 to the A20. It still is, but now even worse.

If this planning process succeeds make no mistake , more children and the elderly will suffer. Gravesham will have been responsible.

On safety grounds alone this application must fail.
