Re: Public Right of Way NS190

I am writing to advise regarding a track for motorised vehicles operating across a public footpath.

It must be noted that this will deter some public from using the PROW and according to PROW regulations will therefore be causing "an Obstruction".

If the track is thus subsequently stopped from use the building proposed would be of little use.

Can I suggest this information is passed to the Applicant who might then consider withdrawing the current Application.

A small building at Sole Street should be preferable for storage purposes and a bottling plant located at one of many industrial estates in the Gravesend area which will have good road access, hard standing, power and drainage.
