PLANTING TO VALLEY DRIVE

Cyrtomium Fortunei		C. fortunei is an evergreen fern with erect 'shuttlecocks' of pinnate fronds to 1.2m tall, with about 20 pairs of narrowly sickle-shaped, dull green leaflets	Position Full shade Partial shade Aspect South-facing or West-facing or East-facing Exposure Sheltered Hardiness Hardiness ratings H3	Botanical details Family Dryopteridaceae Native to the UK No Foliage Evergreen Habit Bushy Genus Cyrtomium can be tufted evergreen or deciduous ferns with simply pinnate leaves composed of sickle-shaped pinnae; spore-heaps are scattered over the lower surface of the frond Name status Correct Plant range Temperate Asia
Dryopteris Filix-mas		D. filix-mas is a robust deciduous fern forming a shuttlecock-like tuft of lance-shaped, bipinnatifid fronds to 1.2m in height	Position Full shade Partial shade Aspect North-facing or West-facing or East-facing or South-facing Exposure Exposed or Sheltered Hardiness Hardiness ratings H7	Botanical details Family Dryopteridaceae Native to the UK Yes Foliage Deciduous Habit Tufted Genus Dryopteris can be deciduous, semi-evergreen or evergreen ferns, with stout, erect or decumbent rhizomes and shuttlecock-like rosettes of lance-shaped to ovate, pinnately divided fronds Name status Correct Plant range N Temperate regions
Liriope Muscari		L. muscari is an evergreen tuberous perennial forming a dense clump of narrow, arching, leathery, dark green leaves, with small violet-purple flowers carried in dense, erect spikes to 30cm in height in autumn, followed by black berries	Position Full shade Partial shade Aspect West-facing or East-facing or North-facing Exposure Sheltered Hardiness Hardiness ratings H5	Botanical details Family Asparagaceae Native to the UK No Foliage Evergreen Habit Clump forming Genus Liriope are evergreen herbaceous perennials forming compact clumps or spreading patches of arching, linear leaves and dense spikes or racemes of small globose flowers, followed by black berries Name status Correct Plant range China, Taiwan, Japan

Polypodium Vulgare			P. vulgare is an evergreen terrestrial or epiphytic fern, to 30cm tall, with creeping rhizomes and lance-shaped to oblong, pinnate or very deeply pinnatifid dark green fronds	Position Full sun Partial shade Aspect South-facing or North-facing or West-facing or East-facing Exposure Sheltered Hardiness Hardiness ratings H7	Botanical details Family Polypodiaceae Native to the UK Yes Foliage Evergreen Habit Matforming Genus Polypodium can be evergreen or deciduous ferns, with creeping rhizomes bearing simple or pinnate fronds at intervals Name status Correct Plant range Eurasia
Vinca Minor 'Atropurpurea'			dark purple-flowered periwinkle 'Atropurpurea' is a wide-spreading evergreen perennial about 10cm in height, with ovate, dark green leaves and deep reddish-purple flowers 2.5cm in width	Position Full shade Full sun Partial shade Aspect South-facing or East-facing or North-facing or West-facing Exposure Exposed or Sheltered Drought resistance Yes Hardiness Hardiness ratings H6	Botanical details Family Apocynaceae Native to the UK No Foliage Evergreen Habit Matforming Genus Vinca can be evergreen subshrubs or herbaceous perennials, with simple, paired leaves and solitary, 5-lobed, salver-shaped flowers in the leaf axils
COURTYARD					
Alchemilla Mollis			lady's mantle An herbaceous perennial forming a clump of softly hairy, light green leaves with scalloped and toothed edges. Small, bright yellow flowers are borne in large sprays just above the foliage	position Full shade Full sun Partial shade Aspect South-facing or North-facing or East-facing or West-facing Exposure Exposed or Sheltered Hardiness H7	Botanical details Family Rosaceae Native to the UK No Foliage Deciduous Habit Clump forming Genus Alchemilla are perennials with palmately lobed basal leaves and sprays of tiny, yellow or greenish flowers Name status Correct Plant range Carpathians, Caucasus

Cornus Sanguinea 'Midwinter Fire'			dogwood 'Midwinter Fire' a spreading shrub to 2m tall, with orange-red and yellow young shoots bearing oval leaves and insignificant white flowers in summer; grown for the coloured stems which are brightest in winter	Position Full sun Partial shade Aspect South-facing or North-facing or West-facing or East-facing Exposure Exposed or Sheltered Hardiness H6	Botanical details Family Cornaceae Native to the UK Yes Foliage Deciduous Habit Suckering Genus Cornus can be deciduous shrubs or trees, or creeping, woody-based perennials, some with brightly coloured young stems. Tiny flowers are borne in dense clusters, sometimes with showy bracts. Many have fine autumn colour Name status Accepted
Dryopteris Filix-mas			D. filix-mas is a robust deciduous fern forming a shuttlecock-like tuft of lance-shaped, bipinnatifid fronds to 1.2m in height	Position Full shade Partial shade Aspect North-facing or West-facing or East-facing or South-facing Exposure Exposed or Sheltered Hardiness H7	Botanical details Family Dryopteridaceae Native to the UK Yes Foliage Deciduous Habit Tufted Genus Dryopteris can be deciduous, semi-evergreen or evergreen ferns, with stout, erect or decumbent rhizomes and shuttlecock-like rosettes of lance-shaped to ovate, pinnately divided fronds Name status Correct Plant range N Temperate regions
X Fatshedera Lizei			tree ivy a medium-sized evergreen shrub to 2m, larger if trained to climb, with large, leathery, palmately lobed leaves and small flowers in globose panicles	Position Full sun Partial shade Aspect South-facing or North-facing or West-facing or East-facing Exposure Sheltered Hardiness H3	Botanical details Family Araliaceae Native to the UK No Foliage Evergreen Habit Bushy Genus x Fatshedera are evergreen shrubs that can be trained to climb, with glossy, leathery, palmately lobed leaves and terminal panicles of small greenish-white flowers Name status Correct

Lavandula Spica 'Hidcote'		English lavender 'Hidcote' 'Hidcote' is a bushy dwarf evergreen shrub with narrow, silvery-grey leaves and small deep violet-purple flowers in dense, aromatic spikes 3-4cm in length	Position Full sun Aspect South-facing or West-facing or East-facing Exposure Sheltered Drought resistance Yes Hardiness H5	amily Lamiaceae Native to the UK No Foliage Evergreen Habit Bushy Genus Lavandula are small aromatic evergreen shrubs with usually narrow, simple, entire, toothed or lobed leaves and small tubular flowers in dense spikes in summer Name status Accepted
Pennisetum Alopecuroides 'Hameln'		Chinese fountain grass 'Hameln' 'Hameln' is a clump-forming perennial grass with arching linear leaves and cylindrical panicles of bristly, purple-tinged spikelets in late summer	Position Full sun Aspect South-facing or West-facing Exposure Sheltered Hardiness H3	Botanical details Family Poaceae Native to the UK No Foliage Evergreen Habit Tufted Genus Pennisetum can be annual or perennial, evergreen or deciduous grasses, clump-forming or spreading in habit, with linear leaves and narrow flowering panicles with conspicuous bristles Name status Accepted
Polystichum Setiferum		soft shield fern P. setiferum is a tufted evergreen fern to 1.2m in height, with rosettes of soft textured, lance-shaped mid-green fronds, the stalks with prominent orange-brown scales	Position Full shade Partial shade Aspect North-facing or South-facing or West-facing or East-facing Exposure Exposed or Sheltered Hardiness H7	Botanical details Family Dryopteridaceae Native to the UK No Foliage Evergreen Habit Tufted Genus Polystichum are mostly evergreen or semi-evergreen ferns, with short stout rhizomes and pinnately divided fronds in neat shuttlecock-like rosettes Name status Correct Plant range Europe, Asia, Africa

Rosmarinus Officinalis		rosemary [2] R. officinalis is a bushy shrub with a dense, leafy habit, to 2m x 2m but variable in size. Linear dark green leaves 1.5-5cm long have recurved margins and pale, felty undersides. Flowers usually pale violet-blue and white. Flowering starts in spring but is often repeated at differing times of year. Both habit and flower colour can be variable, from prostrate to upright, from deep blue to paler and white tones, pink or purple. Many selections and cultivars are available	Position Full sun Aspect South-facing or West-facing or East-facing Exposure Exposed or Sheltered Hardiness H4	Botanical details Family Lamiaceae Native to the UK No Foliage Evergreen Habit Bushy Genus Salvia can be annuals, biennials, herbaceous or evergreen perennials, or shrubs. They have paired, simple or pinnately lobed, often aromatic leaves and 2-lipped flowers in whorls, forming simple or branched spikes or racemes Name status Correct Plant range Mediterranean
Stipa Tenuissima		Mexican feather grass S. tenuissima is a deciduous grass to 60cm, forming a compact upright tuft of thread-like leaves, with narrow, arching, feathery flowering panicles in summer	Position Full sun Aspect South-facing or West-facing or East-facing or North-facing Exposure Exposed or Sheltered Hardiness H4	Botanical details Family Poaceae Native to the UK No Foliage Deciduous Habit Tufted Genus Stipa can be evergreen or deciduous, mostly perennial grasses with arching, folded or rolled, linear leaves and narrow panicles of often long-awned spikelets in summer and autumn Name status Correct Plant range USA to S America
Climbers: Rosa 'Wedding Day'		rose 'Wedding Day' A strong-growing, very large rambler with relatively thornless glossy, mid-green leaves and large sprays of fragrant, single, creamy-white flowers 2.5cm across, in summer	Position Full sun Partial shade Aspect South-facing or North-facing or East-facing or West-facing Exposure Exposed or Sheltered Hardiness H6	Botanical details Family Rosaceae Native to the UK No Foliage Deciduous Habit Climbing Genus Rosa can be deciduous or semi-evergreen shrubs or scrambling climbers, with usually thorny stems bearing compound pinnate leaves and solitary or clustered flowers. Flowers may be followed by showy red or purple fruits in some varieties. Name status Accepted Horticultural Group Rambler roses are vigorous shrubs with long, arching, thorny or smooth stems carrying glossy foliage and large sprays of small, single or double, often fragrant flowers in early summer
EDGE TO COURTYARD				

Buxus Sempervirens		common box A large, evergreen shrub or small tree to 5m tall, with glossy, dark green leaves to 3cm long, and small, yellowish flowers in clusters, produced in the leaf axils during spring	Position Partial shade Full sun Aspect East-facing or South-facing or North-facing or West-facing Exposure Exposed or Sheltered Hardiness H6	Botanical details Family Buxaceae Native to the UK Yes Foliage Evergreen Habit Bushy Potentially harmful Ingestion may cause stomach upset, contact may irritate the skin. Wear gloves and other protective equipment when handling Genus Buxus can be evergreen shrubs or small trees, with simple, leathery, opposite leaves and clusters of small, pale yellow flowers followed by pale green to brown fruits Name status Correct Plant range SW Eurasia, N Africa
Hebe 'Mrs Winder'		hebe 'Mrs Winder' A spreading evergreen small shrub with narrow, dark green leaves, the youngest tinged with reddish-brown. Flowers small, violet-blue, in racemes to 7cm in length	Position Full sun Partial shade Aspect South-facing or North-facing or West-facing or East-facing Exposure Exposed or Sheltered Hardiness H4	Botanical details Family Plantaginaceae Native to the UK No Foliage Evergreen Habit Bushy Genus Veronica can be annuals, perennials or sub-shrubs with paired leaves and small flowers usually in terminal or axillary racemes or spikes Name status Accepted
Sarcococca Humilis		'Fragrant Valley' A small, slow-growing, spreading evergreen shrub to 60cm tall, with glossy, elliptic leaves. Small, fragrant, creamy white flowers are borne in the leaf axils in winter, and hang under the foliage. Female flowers are followed by glossy black berries.	Position Full shade Full sun Partial shade Aspect East-facing or North-facing or South-facing or West-facing Exposure Exposed or Sheltered Hardiness H5	Botanical details Family Buxaceae Native to the UK No Foliage Evergreen Habit Bushy Genus Sarcococca are compact, sometimes suckering evergreen shrubs with simple, leathery leaves and tiny, fragrant creamy-white flowers in winter or spring, followed by red, purple or black berries which may persist into the following winter Name status Trade

CAR PARKS

Buxus Sempervirens

common box
A large, evergreen shrub or small tree to 5m tall, with glossy, dark green leaves to 3cm long, and small, yellowish flowers in clusters, produced in the leaf axils during spring

Position
Partial shade
Full sun
Aspect
East-facing or South-facing or North-facing or West-facing
Exposure

Genus
Pinus can be shrubs or large, evergreen trees, some species with attractive bark, developing an irregular outline with age and bearing long needle-like leaves in bundles of 2, 3 or 5; conspicuous cones may fall or remain on the tree for years
Name status
Accepted
Plant range
C & S Europe

Sarcococca Humilis		'Fragrant Valley' A small, slow-growing, spreading evergreen shrub to 60cm tall, with glossy, elliptic leaves. Small, fragrant, creamy white flowers are borne in the leaf axils in winter, and hang under the foliage. Female flowers are followed by glossy black berries.	Position Full shade Full sun Partial shade Aspect East-facing or North-facing or South-facing or West-facing Exposure Exposed or Sheltered Hardiness H5	Botanical details Family Buxaceae Native to the UK No Foliage Evergreen Habit Bushy Genus Sarcococca are compact, sometimes suckering evergreen shrubs with simple, leathery leaves and tiny, fragrant creamy-white flowers in winter or spring, followed by red, purple or black berries which may persist into the following winter Name status Trade
Viburnum Davidii		David viburnum A small spreading evergreen shrub, with elliptic, deep green, leathery, three-veined leaves and flattened heads of small dull white flowers followed on cross-pollinated plants by long-lasting 'metallic' blue-black berries	Position Full sun Partial shade Aspect North-facing or South-facing or West-facing or East-facing Exposure Exposed or Sheltered Hardiness H5	Botanical details Family Viburnaceae Native to the UK No Foliage Evergreen Habit Bushy Genus Viburnum can be deciduous or evergreen shrubs with opposite, simple or palmately lobed leaves and clusters of small, often fragrant white or pink flowers, followed by red, blue or black berries Name status Correct Plant range W China
FRONT GARDENS				

Hebe 'Midsummer Beauty'		hebe 'Midsummer Beauty' A medium-sized evergreen shrub to 2m in height, rounded in habit, with long narrow leaves tinged purple when young. Small lilac-mauve flowers, fading to white, are borne in racemes to 15cm in length in summer and autumn	Position Full sun Partial shade Aspect North-facing or East-facing or South-facing or West-facing Exposure Exposed or Sheltered Hardiness H4	Botanical details Family Plantaginaceae Native to the UK No Foliage Evergreen Habit Bushy Genus Veronica can be annuals, perennials or sub-shrubs with paired leaves and small flowers usually in terminal or axillary racemes or spikes Name status Accepted
Sisyrinchium Striatum		pale yellow-eyed grass S. striatum is a clump-forming perennial, to 80cm tall, with fans of grey-green, narrow, linear to lance-shaped leaves. In summer, stiff, upright stems carry clusters of pale yellow, star-shaped flowers along their length	Position Full sun Aspect South-facing or East-facing or West-facing Exposure Exposed or Sheltered Hardiness H4	Botanical details Family Iridaceae Native to the UK No Foliage Semi evergreen Habit Bushy Genus Sisyrinchium can be annuals or rhizomatous perennials forming a clump of narrowly sword-shaped leaves with erect stems carrying solitary or clustered, star-shaped or bell-shaped flowers in spring or summer Name status Correct Plant range Argentina, Chile

Verbena Bonariensis		purple top V. bonariensis is a tall perennial with erect, branching stems to 2m in height, bearing sparse, oblong leaves and numerous branched clusters of small, purple flowers from summer to autumn	Position Full sun Aspect West-facing or South-facing Exposure Exposed or Sheltered Hardiness H4	Botanical details Family Verbenaceae Native to the UK No Foliage Deciduous Habit Columnar upright Genus Verbena can be annuals, perennials or sub-shrubs, with toothed or pinnately lobed leaves and small, usually 5-petalled, salver-shaped flowers, typically held in spikes or panicles, in summer or autumn Name status Correct Plant range South America
---------------------	---	--	---	---

REAR GARDENS

Buxus Sempervirens		common box A large, evergreen shrub or small tree to 5m tall, with glossy, dark green leaves to 3cm long, and small, yellowish flowers in clusters, produced in the leaf axils during spring	Position Partial shade Full sun Aspect East-facing or South-facing or North-facing or West-facing Exposure Exposed or Sheltered Hardiness H6	Botanical details Family Buxaceae Native to the UK Yes Foliage Evergreen Habit Bushy Potentially harmful Ingestion may cause stomach upset, contact may irritate the skin. Wear gloves and other protective equipment when handling Genus Buxus can be evergreen shrubs or small trees, with simple, leathery, opposite leaves and clusters of small, pale yellow flowers followed by pale green to brown fruits Name status Correct Plant range SW Eurasia, N Africa
--------------------	--	--	--	--

Dryopteris Filix-mas		D. filix-mas is a robust deciduous fern forming a shuttlecock-like tuft of lance-shaped, bipinnatifid fronds to 1.2m in height	Position Full shade Partial shade Aspect North-facing or West-facing or East-facing or South-facing Exposure Exposed or Sheltered Hardiness H7	Botanical details Family Dryopteridaceae Native to the UK Yes Foliage Deciduous Habit Tufted Genus Dryopteris can be deciduous, semi-evergreen or evergreen ferns, with stout, erect or decumbent rhizomes and shuttlecock-like rosettes of lance-shaped to ovate, pinnately divided fronds Name status Correct Plant range N Temperate regions
X Fatshedera Lizei 'Annemieke'		tree ivy 'Annemieke' 'Annemieke' is a lax medium-sized evergreen shrub with large, leathery, palmately lobed leaves with a conspicuous central yellow-green blotch. Small white flowers in globose clusters	Position Full sun Partial shade Aspect West-facing or East-facing or South-facing Exposure Sheltered Hardiness H3	Botanical details Family Araliaceae Native to the UK No Foliage Evergreen Habit Bushy Genus x Fatshedera are evergreen shrubs that can be trained to climb, with glossy, leathery, palmately lobed leaves and terminal panicles of small greenish-white flowers Name status Accepted
SOUTHERN EDGE				
Cornus Sanguinea		common dogwood A deciduous shrub of upright, bushy habit, with young shoots reddish in winter, ovate leaves turning deep red in autumn, and small white flowers in flat clusters, followed by black berries	Position Full sun Partial shade Aspect South-facing or North-facing or West-facing or East-facing Exposure Exposed or Sheltered Hardiness H6	Botanical details Family Cornaceae Native to the UK Yes Foliage Deciduous Habit Bushy Genus Cornus can be deciduous shrubs or trees, or creeping, woody-based perennials, some with brightly coloured young stems. Tiny flowers are borne in dense clusters, sometimes with showy bracts. Many have fine autumn colour Name status Correct Plant range Europe

Lonicera Nitida		Wilson's honeysuckle A dense, evergreen shrub, growing to 3.5m tall and 3m wide, with small, ovate, glossy dark-green leaves on arching branches. Tiny cream flowers in spring are followed, in autumn, by sparse, glossy, blue-purple berries	Position Full sun Partial shade Aspect South-facing or North-facing or West-facing or East-facing Exposure Exposed or Sheltered Hardiness H6	Botanical details Family Caprifoliaceae Native to the UK No Foliage Evergreen Habit Bushy Genus Lonicera can be deciduous and evergreen shrubs, or climbers with twining stems. The tubular or two-lipped flowers, often very fragrant, are followed by red or black berries Name status Correct Plant range China
Pyracantha 'Orange Glow'		firethorn 'Orange Glow' 'Orange Glow' is a large, strong-growing, spiny evergreen shrub of upright habit, with oblong, glossy dark green leaves. Clusters of small, white flowers in early summer are followed by long-lasting, bright orange berries	Position Full sun Partial shade Aspect North-facing or West-facing or South-facing or East-facing Exposure Exposed or Sheltered Drought resistance Yes Hardiness H6	Botanical details Family Rosaceae Native to the UK No Foliage Evergreen Habit Bushy Potentially harmful The seeds may cause mild stomach upsets if ingested. Wear gloves and wash hands after handling Genus Pyracantha are evergreen shrubs or small trees, with spiny branches bearing simple leaves and corymbs of small white flowers followed by showy red, orange or yellow berries Name status Accepted
Symphoricarpos Rivularis				Botanical details Family Caprifoliaceae Native to the UK No Genus Symphoricarpos Genus description Symphoricarpos are twiggly deciduous shrubs, sometimes suckering, with small, simple leaves and tiny bell-shaped pink or white flowers, followed by juicy white pink or purple berries Name status Correct

GROUNDCOVERS TO BANK

Buxus Sempervirens		common box A large, evergreen shrub or small tree to 5m tall, with glossy, dark green leaves to 3cm long, and small, yellowish flowers in clusters, produced in the leaf axils during spring	Position Partial shade Full sun Aspect East-facing or South-facing or North-facing or West-facing Exposure Exposed or Sheltered Hardiness H6	Botanical details Family Buxaceae Native to the UK Yes Foliage Evergreen Habit Bushy Potentially harmful Ingestion may cause stomach upset, contact may irritate the skin. Wear gloves and other protective equipment when handling Genus Buxus can be evergreen shrubs or small trees, with simple, leathery, opposite leaves and clusters of small, pale yellow flowers followed by pale green to brown fruits Name status Correct Plant range SW Eurasia, N Africa
Dryopteris Filix-mas		D. filix-mas is a robust deciduous fern forming a shuttlecock-like tuft of lance-shaped, bipinnatifid fronds to 1.2m in height	Position Full shade Partial shade Aspect North-facing or West-facing or East-facing or South-facing Exposure Exposed or Sheltered Hardiness H7	Botanical details Family Dryopteridaceae Native to the UK Yes Foliage Deciduous Habit Tufted Genus Dryopteris can be deciduous, semi-evergreen or evergreen ferns, with stout, erect or decumbent rhizomes and shuttlecock-like rosettes of lance-shaped to ovate, pinnately divided fronds Name status Correct Plant range N Temperate regions
X Fatshedera Lizei 'Annemieke'		tree ivy 'Annemieke' 'Annemieke' is a lax medium-sized evergreen shrub with large, leathery, palmately lobed leaves with a conspicuous central yellow-green blotch.
